

LIP BLUSH PRE CARE INSTRUCTIONS

Permanent cosmetic procedures normally require multiple treatment sessions. For best results, clients will be required to return for at least one retouch procedure, usually between 6 and 8 weeks after the initial procedure. Be prepared for the color intensity to be significantly sharper and darker immediately after the procedure. This will subside and become lighter as the tissue heals. This process can take up to 10 days.

LIP BLUSH PRE CARE INSTRUCTIONS

- Make sure to avoid the sun & sunburn before your appointment.
- Make sure to avoid working out the day of your appointment.
- Make sure to come to your appointment with moisturized lips. You cannot get your tattoo with chapped lips.
- Prep lips by using a lip scrub & lip ointment 3 days before the appointment.
- No coffee or alcohol 24 hours in advance.
- Clients with herpes or prone to cold sores should speak with their doctor & medicate before & after their procedure.

Contraindications:

- Must not be pregnant or nursing.
- Diabetes or any autoimmune disorder.
- Must not be undergoing chemotherapy or cancer treatments.
- Hormonal or thyroid issues (can cause pigment to not retain)
- HIV or immune compromising diseases.
- Liver disease (high risk of infection)
- Blood thinning medications/substances or plasma donation within 7 days

LIP BLUSH AFTER CARE INSTRUCTIONS

Proper care following your procedure is necessary to achieve the best results. Keep in mind that in many cases, some unevenness of color is to be expected. This is the purpose of the re-touch visit. Please review the following directions and refer to them as necessary.

If during the healing process you have any questions or concerns, please contact your technician.

YOU MAY EXPERIENCE FOR THE FOLLOWING 72 HOURS:

- Flaking;
- Tenderness;
- Dryness and itchiness in the treated area;
- Swelling and redness.

FOR THE FIRST FIVE DAYS:

- The treated area can only be cleansed using the provided antiseptic wipes or antibacterial soap by blotting/washing in the morning & before bed.
- No excess water or other cleansers can be used for any reason! A very thin layer of Vitamin A&D ointment should be applied to the treatment area using a fresh Q-tip.
- Do not let the area dry out and crack, keep it moist at all times. Do not press or rub when applying ointment, at least 3 times a day.

- Apply an extra heavy coat of ointment to the treated area ONLY before bathing, washing of adjacent areas or brushing your teeth. When brushing teeth for the first five days, use minimal amount of toothpaste. Toothpaste and mouthwash may be harsh on the lips and may remove the lip color.
- Clients should avoid all prolonged outdoor sun exposure for the first 30 days. Any prolonged sun exposure will lead to premature loss of color or can cause a change in the color of fresh pigment.
- Do not touch or allow any friction such as kissing, biting into food, picking, exfoliating, etc.
- Do not let any water, lotion, soap, or makeup touch the lips.
- Use a straw when drinking liquids. No hot liquids.
- No foreign body fluids.
- No physical activity that causes extreme sweating.
- No swimming pools, saunas, lakes or other water.
